TITLE: SELF-ADHESIVE WIG FLEXIBLE ELEMENT AND WIG EQUIPPED
WITH SAME

Amendment A: CLAIM AMENDMENTS

Claims 1 - 10 (canceled).

11. (new) A wig assembly comprising:

a cap having an inside surface, said cap having a shape suitable for fitting on a human head; and

a plurality of flexible fabric strips affixed across said inside surface of said cap, each of said plurality of flexible fabric strips having an inside surface coated with a film of polysiloxane, said film of polysiloxane contacting the human head when said cap is placed on the human head.

12. (new) The wig assembly of Claim 11, each of said plurality of flexible fabric strips being elastic.

13. (new) The wig assembly of Claim 12, the strip being stretchable end-to-end and side-to-side.

14. (new) The wig assembly of Claim 11, said film of polysiloxane having a weight of between 100 and 200 g/m².

15. (new) The wig assembly of Claim 11, said file of polysiloxane being a single-component polysiloxane.

16. (new) The wig assembly of Claim 11, said film of polysiloxane being a solvent-free polysiloxane.

17. (new) The wig assembly of Claim 11, further comprising:

a plurality of wefts supporting hair thereon, said plurality of wefts affixed to at least some of said plurality of flexible fabric strips.

18. (new) The wig assembly of Claim 11, further comprising:

a plurality of strands of hair implanted directly onto said plurality of flexible fabric strips.
